ACADEMIC PROFILE & RESEARCH DIRECTION

Informatics undergraduate at **Ionian University** with strong foundations in algorithm engineering, computational complexity, and applied machine learning. Actively engaged in empirical AI research and evaluation of efficiency and sustainability of code generation. Practical background in local AI systems, athleisure applications and drone engineering.

EDUCATION

B.Sc. in Informatics (Candidate) — Ionian University

2024 – Present

- **Core Focus:** Algorithms & Data Structures, Machine Learning, Computational Modeling, Scientific Computing, Systems Architecture.
- **Institutional Context:** Department of Informatics, Corfu, Greece — Collaborating within departmental research initiatives (CMOD lab / ISDLAB).

RESEARCH & KEY ENGINEERING PROJECTS

1. Empirical Energy & Computational Complexity Benchmarking of AI Code
2. Interactive Graph Traversal & Pathfinding Visualizer
3. LocalWhisperFlow: Offline Speech Processing Engine
4. Athletic Training Periodization & Monitoring System
5. Autonomous Agent Harnesses & Knowledge Automation Suite
6. Order Automation & Data Extraction Pipeline

TECHNICAL COMPETENCIES

- **Programming & Systems:** Python, Java, C/C++, TypeScript, JavaScript, HTML, XML, SQL, Bash / PowerShell, Linux, Git / GitHub, Docker
- **Machine Learning & AI:** NumPy, Pandas, Scikit-Learn
- **Profiling & Scientific Computing:** CodeCarbon, Matplotlib, Seaborn, Statistical Profiling
- **Hardware & Embedded:** Telemetry Calibration, Microcontroller Firmware (Arduino / ESP32), Drone Flight Controllers
